

The robust power pack for liquid screed

FHS 250

STAGE V
ready to work

For self levelling floor screed

- Cement screed
- Calcium sulphate screed

Legends never die!

Never before had a FHS so much power: With its 37 kW diesel engine which complies with the exhaust emissions standard "Stage V", the successor to the well-known FHS 200/3 pumps liquid screed in grain sizes up to 12 mm even better than before.

The completely redesigned hydraulic concept makes possible a variety of comfort functions and ensures maximum reliability and availability of the machine.

- Robust design – tried-and-tested in construction site use and on the test track
- Supports a variety of worm pumps through to the 2L8
- Larger filling area with pivoted splash guard
- Mesh with standard vibrator prevents oversized particles without impacting the material flow
- Reliable remote control makes possible a variety of functions
- Low maintenance costs

BRINKMANN

All benefits at a glance

- **Central control with intuitive keypad and clearly arranged display**
- **Lower filling height facilitates final cleaning and loading by truck mixer**
- **Larger tank for maximum operational performance without refuelling**
- **Support feet for stability on the construction site**
- **Robust plastic cover according to the highest quality standard**
- **Safe transfer of machine with crane – thanks to integrated crane lugs**
- **Tool compartment provides storage space for replacement worm**

Technical data FHS 250

Delivery range*	200 m wide / 60 m high (20 floors)
Delivery rate (theo.)*	up to 20 m³/h
Engine	3-cylinder Kubota; 37 kW at 2 700 rpm
Pump	Worm pump 7515 Premium
Grain size	8 mm
Hopper	250 l
Tank capacity	40 l
Weight	1 050 kg
Chassis	braked, suitable for road use
Length × width × height	4 280 × 1 410 × 1 300 mm
Filling height	730 mm

Equipment

	Standard	Optional
Car coupling	■	
Lifting eye	■	
Radio remote control with output regulation + Engine On/Off	■	
Support legs	■	
Supporting wheel	■	
Vibrating screen with 15 mm mesh width (grid)	■	
Vibrator	■	
High-pressure cleaner		■
Special painting canopy in RAL colour		■
Tool box		■
Truck coupling		■
Working lights		■
Worm parts 2L8 (max. grain size 12 mm)		■

* Data are maximum values and depend on material type and consistency, hose diameter and delivery rate.

■ Series ■ Optional

Suitable for small construction sites
 Suitable for large construction sites
