## **Putzmeister and the master screed layer course in Feuchtwangen**

For many years, Putzmeister Mörtelmaschinen GmbH has been supporting the training of prospective master screed layers at the Bavarian BauAkademie Feuchtwangen with expertise and modern machinery.

This year, Putzmeister was on site with a TransMix 3200, a "screed factory on wheels", as well as a modern compressed air conveyor Mixokret M 740 DHBS to train the prospective master screed layers. The TransMix was provided by Putzmeister customer Jungmann from Sulzfeld for the practical exercises.

Carsten Tiepermann and Toralf Speer, both long-standing employees of Putzmeister Mörtelmaschinen GmbH in sales and application technology, explained the machines in detail in theory and practice. The practical exercises on modern machines were particularly popular with the 23 master students from all over Germany, as they could immediately put into practice what they had learned in theory.

### **About the Putzmeister Group**

The Putzmeister Group develops and produces machinery of high technological quality in the fields of concrete conveying, truck-mounted concrete pumps, stationary concrete pumps, placing booms and accessories, plant technology, conveying viscous industrial materials through pipes, concrete spraying and transport in tunnels and underground, mortar machines, plastering machines, screed conveying, injection and specialist applications. Market segments include the construction industry, mining and tunneling, large industrial projects, power plants and sewage treatment plants, as well as waste incineration plants, all over the world.

The company is based in Aichtal. With approx. 2,960 employees, the company achieved a turnover of EUR 632 million in the year 2020.

Carsten Tiepermann, sales representative and application engineer explained the TransMix in theory

To support us, we commissioned our long-standing customer Jungmann from Sulzfeld with its TransMix to support us with his TransMix and his experience. Many questions were asked on the subject of TransMix.
