# HOPPER BAG – A CLEAN SOLUTION

## Practical collection bag for quick and easy cleaning

The Hopper Bag from Putzmeister is an uncomplicated solution for containing and removing concrete and washout waste.

The robust Hopper Bag made of coated plastic fabric is positioned underneath the hopper or chute after pumping operation. Fixing the skirt with the additional holding loops reduces contamination and at the same time stabilizes the bag. After completion of cleaning, the Hopper Bag can be lifted effortlessly on the four built-in lifting loops.

The high fabric quality and the expertise in the final sewing by hand ensures the necessary and tested safety during removal and storage.

This way, you are sure to leave a clean impression on the construction site.

## One size for many applications

- Part number: 726339
- Safe working load: 1250 kg
- 5-fold safety factor
- Tested payload according to ISO 21898
- Dimensions: approx. 110 × 150 × 50 cm
- With filling skirt 50 cm
- 4 lifting loops at the transverse corners for safe and easy removal by forklift or crane
- 4 retaining loops for quick attachment to the hopper
- Coating withstands wet or dusty material
